

Join CP³-World

The Centre of excellence for Particle Physics Phenomenology (CP³-Origins), dedicated to the origins of the dark and bright side of the Universe, in collaboration with the Danish Institute for Advanced Study (DIAS) introduces the **CP³-World** program.

The **CP³-World** program provides the opportunity to apply for funding for a research visit of one to two months to the centre. The goal is to give international researchers the opportunity to keep abreast of developments in particle physics, astroparticle, lattice field theory, and cosmology. The researchers awarded with funding for travel expenses and local accommodation will be part of a strong and scientifically alive research environment.

Priority will be given to excellent researchers from Brazil, China, India, Japan, Russia, South Africa, and South Korea. However nominations from other countries will also be considered. The chosen researchers can be asked to give a one week mini-course in their main research topic at the graduate level, a lecture, or a public lecture.

Information on how to apply can be found **here**:
